Portofolio :

SUMMARY

Recent Informatics Management (D3) graduate of Politeknik Astra with hands-on full-stack development experience across web and mobile (Next.js, ASP.NET, React, React Native, Laravel, Spring Boot) and relational databases (SQL Server, MySQL, Oracle). Recently expanded into Computer Vision and Deep Learning by designing and deploying a real-time defect-detection system on edge hardware for PT Astra Daihatsu Motor. Combines strong business-process analysis skills with a growing AI/ML skillset, and is eager to contribute to innovative, data-driven IT solutions.

EDUCATION

Astra Polytechnic - D3, Informatics Management | GPA 3.53/4.00 **Aug 2023 - Aug 2026**

- Software Engineering
- Database Systems
- System Modeling
- Requirements Analysist
- Mobile Programming
- Computer Vision.

SMK Negeri 36 Jakarta - Multimedia **Jul 2020 - May 2023**

- Visual design and digital media production
- Foundation in design principles and content creation

TECHNICAL SKILLS

AI / Computer Vision	:	Python, YOLOv8 (OBB), OpenCV, Roboflow, Deep Learning, Edge AI Deployment (NVIDIA Jetson)
Programming	:	Python, JavaScript, Java, C#
Frameworks & Libraries	:	React.js, React Native, Next.js, Flask, ASP.NET, Java Spring, Laravel
Architecture	:	3-Tier Architecture, REST API
Database	:	SQL Server, MySQL, Oracle
Tools	:	Postman, Visual Studio Code, Visual Studio, IntelliJ, draw.io, Android Studio, Figma
Methodologies	:	SDLC, Waterfall, System Prototyping, Throwaway Prototyping

WORK EXPERIENCE

PT Astra Daihatsu Motor | Karawang **Jan 2026 - Jul 2026**
Internship – Maintenance Engineering Division
Digitalization & Computer Vision Development

- Assigned to the Maintenance Engineering section of the Maintenance Press department, supporting the team's digitalization initiatives.
- Worked closely with maintenance and press-line technicians to understand recurring equipment issues and translate them into digital monitoring requirements.
- Conducted on-site data collection and testing under real production conditions to validate the resulting solution.
- Reported progress and technical findings to industrial supervisors and academic advisors throughout the internship.

PT Forisa NusaPersada | Jakarta **Jun 2022 - Aug 2022**
Internship – Sales & Distribution Data Validation

- Recorded and validated sales and branch distribution data to ensure geographic and sales-performance accuracy.

PT Serasi Autoraya (SERA) | Jakarta **Feb 2022 - May 2022**
Internship – Finance, Accounting & Tax Division

- Assisted with administrative and financial record-keeping tasks, helping ensure the accuracy and orderliness of company documents.
- Actively learned and participated in the division's day-to-day administrative processes.

PROJECT EXPERIENCE

Timing Belt Condition Monitoring System – PT Astra Daihatsu Motor **Jan 2026 - Jul 2026**
Tech Stack: Python, YOLOv8s-OBB, OpenCV, Flask, React-Vite, MySQL, NVIDIA Jetson Orin Nano, Roboflow

- Designed and deployed a real-time computer vision system using a custom-trained YOLOv8s-OBB model to classify timing belt conditions (OK / Warning / NG) from 4 industrial cameras.
- Built a fully offline 3-tier stack (Flask API, React-Vite dashboard, MySQL) on an NVIDIA Jetson Orin Nano, displayed live on a factory-floor monitor.
- Curated and annotated a custom dataset despite limited on-site data access, iteratively tuning the model for real production conditions.

Full-Stack Developer – Campus Facility Booking System | Website **Sept 2025 - Dec 2025**
Tech Stack: Next.js, ASP.NET, SQL Server

- Co-initiated a campus facility and inventory management system, digitizing the booking and asset-tracking process.
- Modeled the Purchase Requisition workflow and produced UML diagrams to align stakeholders on system scope.

Developer – Master Part Safety Grade Migration | PT Astra Honda Motor **Feb 2025 - Jul 2025**
Tech Stack: HTML, Java Spring, Oracle

- Developed using Waterfall methodology, systematically executing code delivery based on structured system requirements.
- Built internal part data management modules with a primary focus on secure CRUD feature implementations and Oracle database connectivity.

Full Stack Developer – MINFOIN | Mobile Information App **Mar 2025 - Jul 2025**
Tech Stack: React Native, SQL Server

- Acted as full-stack developer building an Android information app for the Informatics Management program.
- Designed the UI in React Native and managed the SQL Server database, completing 6 master-data sets and 1 core transaction module.

CERTIFICATIONS

Samsung Innovation Campus **Oct 2025**
Code Kickstart: Python Programming (Batch 7, 2025/2026)

MikroTik Certified Network Associate (MTCNA) **Feb 2025**
Mikrotik

NDG Linux Unhatched 2024 **Mar 2024**
Cisco Networking Academy

Virtual Machine Fundamental **Feb 2024**
Aguna Course

ORGANIZATIONAL EXPERIENCE

Member - Tim Paskibra ASTRAtech **Aug 2024 & Aug 2025**
campus flag-ceremony team

Media & Content Manager **2024 - 2025**
Student Executive Board (BEM) period 2024 - 2025

Event Division Coordinator **2024**
NOVASTECH Committee

AWARDS

3rd Place, Scientific Writing Competition **2025**
NOVASTECH, BEM Politeknik Astra

National Finalist, Huawei ICT Competition 2024–2025 **2024**
Network Track, Huawei ICT Academy
