SUMMARY

Recent Informatics Management (D3) graduate of Politeknik Astra with hands-on full-stack development experience across web and mobile (Next.js, ASP.NET, React, React Native, Laravel, Spring Boot) and relational databases (SQL Server, MySQL, Oracle). Recently expanded into Computer Vision and Deep Learning by designing and deploying a real-time defect-detection system on edge hardware for PT Astra Daihatsu Motor. Combines strong business-process analysis skills with a growing AI/ML skillset, and is eager to contribute to innovative, data-driven IT solutions.

EDUCATION

Astra Polytechnic - D3, Informatics Management | GPA 3.53/4.00 **Aug 2023 - Aug 2026**
Core Focus: Software Engineering, Database Systems, System Modeling, Requirements Analysis, Mobile Programming, Computer Vision

SMK Negeri 36 Jakarta - Multimedia **Jul 2020 - Jul 2023**
Core Focus: User Interface (UI) Design Fundamentals, Visual Communication, Digital Content Creation

TECHNICAL SKILLS

AI / Computer Vision	:	YOLOv8 (OBB), OpenCV, Roboflow, Image Processing, NVIDIA Jetson (Edge AI)
Programming Languages	:	Python, JavaScript, Java, C#, SQL
Frontend & Mobile	:	React.js (Vite), Next.js, React Native, HTML5/CSS3
Backend & API	:	Flask, ASP.NET, Java Spring Boot, RESTful API
Database & Architecture	:	SQL Server, MySQL, Oracle (basic) | 3-Tier Architecture
Tools & Methodologies	:	Postman, VS Code, Visual Studio, IntelliJ, Android Studio, Figma, draw.io | SDLC, Waterfall, System Prototyping, UML

WORK EXPERIENCE

PT Astra Daihatsu Motor | Karawang **Jan 2026 - Jul 2026**
Internship – Maintenance Engineering Division
Digitalization & Computer Vision Development

- Identified recurring press-line timing belt failures (tooth loss) and translated manual inspection pain points into digital monitoring requirements.
- Designed and deployed an automated computer vision system to classify timing belt health (Normal, Warning, NG) in real time.
- Conducted on-site data collection and real-world production testing using an NVIDIA Jetson Orin Nano Super edge device.
- Achieved 96% mAP@50 accuracy with a low latency response of 0.225s (P95), well below the 2.0s operational target.

PT Forisa NusaPersada | Jakarta **Jun 2022 - Aug 2022**
Internship – Sales & Distribution Data Validation

- Recorded and validated sales and branch distribution data to ensure geographic and sales-performance accuracy.

PT Serasi Autoraya (SERA) | Jakarta **Feb 2022 - May 2022**
Internship – Finance, Accounting & Tax Division

- Assisted with administrative and financial record-keeping tasks, helping ensure the accuracy and orderliness of company documents.
- Actively learned and participated in the division's day-to-day administrative processes.

PROJECT EXPERIENCE

Timing Belt Condition Monitoring System – PT Astra Daihatsu Motor **Jan 2026 - Jul 2026**
Tech Stack: Python, YOLOv8s-OBB, OpenCV, Flask, React-Vite, MySQL, NVIDIA Jetson Orin Nano, Roboflow

- Trained a custom YOLOv8s-OBB model to accurately classify angled belt teeth into normal, warning, or NG categories, running real-time offline inference on NVIDIA Jetson edge hardware.
- Built a local layered architecture integrating a React-Vite dashboard, Flask REST API, and MySQL database without internet dependency.
- Developed automated snapshot capture upon anomaly detection, historical data filtering from daily to yearly periods, search capabilities, and Excel report exporting.

Campus Facility Booking System | Campus Project (Team of 4) **Sept 2025 - Dec 2025**
Tech Stack: Next.js, ASP.NET, SQL Server

- Digitized campus facility reservations and asset tracking to replace manual requests.
- Built 8 responsive UI pages and core booking workflows via REST APIs.
- Modeled UML diagrams (use case & activity diagram) to align system scope with stakeholders.

Master Part Safety Grade Migration | PT Astra Honda Motor (External Project) **Feb 2025 - Jul 2025**
Tech Stack: HTML, Java Spring, Oracle

- Performed bug fixing and UI enhancements for internal part-data management modules built with Java Spring and Oracle.
- Optimized data upload features and implemented automated validation to ensure smooth database synchronization and eliminate manual entry errors.

MINFOIN – Mobile Information App | Campus Project (Team of 4) **Mar 2025 - Jul 2025**
Tech Stack: React Native, SQL Server

- Built an Android app that gives Informatics Management students and academic staff access to centralized academic announcements, event schedules, and resource sharing.
- Designed the UI in React Native and the SQL Server database, delivering 6 master-data modules and 1 core transaction module.

CERTIFICATIONS

Samsung Innovation Campus **Oct 2025**
Code Kickstart: Python Programming (Batch 7, 2025/2026)

MikroTik Certified Network Associate (MTCNA) **Feb 2025**
Mikrotik

NDG Linux Unhatched 2024 **Mar 2024**
Cisco Networking Academy

Virtual Machine Fundamental **Feb 2024**
Aguna Course

ORGANIZATIONAL EXPERIENCE

Member - Tim Paskibra ASTRAtech **Aug 2024 & Aug 2025**
campus flag-ceremony team

Media & Content Manager **2024 - 2025**
Student Executive Board (BEM) period 2024 - 2025

Event Division Coordinator **2024**
NOVASTECH Committee

AWARDS

3rd Place, Scientific Writing Competition **2025**
NOVASTECH, BEM Politeknik Astra

National Finalist, Huawei ICT Competition 2024–2025 **2024**
Network Track, Huawei ICT Academy
